

# Car Care Clinic for Clean Air

## Saturday, May 2, 2009 – 9 a.m. to 1 p.m.

### Greenville Technical College

#### McKinney Regional Automotive Technology Center

#### 227 North Pleasantburg Drive, Greenville, SC 29607

Do your part to **SPARE THE AIR!** It all adds up to cleaner air in Greenville County

Greenville Tech Automotive Center Technician performing under-the-hood inspection

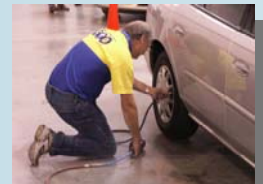

#### Why Should You Attend?

Because 9 out of 10 motorists pump their own gas, tire pressure and under-hood checks are rarely performed, leaving vital maintenance and repairs often undone. Taking an active role in maintaining your vehicle reduces the impact of your vehicle emissions on public health and the environment, prevents future major and costly repairs, and maximizes fuel economy, saving you money! Properly inflated tires also result in better fuel economy! Trained technicians will check the following during the event at no cost:

- Tire air pressure and wear
- Belts and hoses
- Air filters, if easily accessible
- Fluids
- Battery cables
- Major leaks
- Emissions

No vehicle repairs will be made during the event

Your participation in this event is voluntary

#### Learn About Clean Diesel Initiatives

“The diesel industry is on a path to produce virtually emissions-free vehicles and equipment while still retaining the efficiency, reliability and power long associated with diesel. This environmental progress is the result of the new clean diesel system - combining cleaner diesel fuel, advanced engines and effective exhaust-control technology.”

#### Learn about the new BluePerformance technology from BMW

In late 2008, BMW Manufacturing began production of the X5 xDrive35d. Featuring BluePerformance technology, the X5 xDrive35d provides a significant reduction in carbon dioxide emissions, making it the cleanest diesel Sports Activity Vehicle available in the world.

Along with reduced carbon dioxide emissions, BMW's Advanced Diesel technology combines superior performance, excellent fuel economy and is available in all 50 U.S. states. BMW's diesel engines are renowned for their unequalled harmony of dynamic performance, innovative technology, surprisingly low fuel consumption, along with a smoothness that is uncommon for a diesel.

#### Win door prizes!

- 1<sup>st</sup> prize: a gift certificate for a new set of Michelin tires
- 2<sup>nd</sup> prize: a road emergency kit station

Just for coming, you'll also receive two bottles of fuel additive courtesy of Greenville County, NACo, and AutoZone.
